FACTS...**

**FACT #1**

**FACT #2**

From 2000 to 2010 the organic food industry has grown at an average value of 16.5% per year, whereas the average annual growth in the overall food industry is 3.25% . *Source: **Organic Trade Association***

**FACT #3**

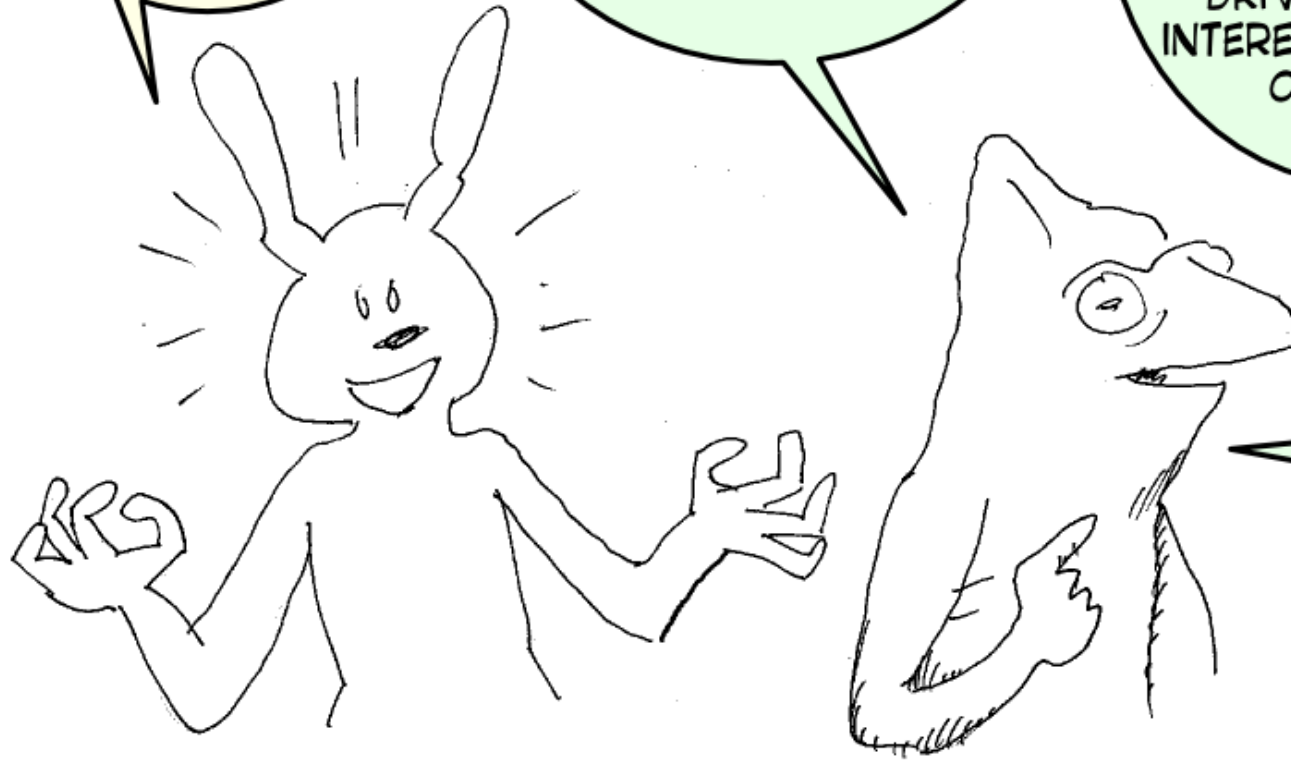

In 2009 more than 41 million U.S. households grew a vegetable garden; 19.5 million households grew an herb garden; 16.5 million households grew fruits; and 37% of households reported plans to increase their edible gardens in 2010. *Source: **Garden Writers Association Foundation***

**GROWING!**

QUITE RIGHT!  
IN THESE UNCERTAIN  
TIMES GARDENING  
AND SELLING THE  
PRODUCE CAN BE  
A **SOURCE OF INCOME**  
FOR MANY PEOPLE!

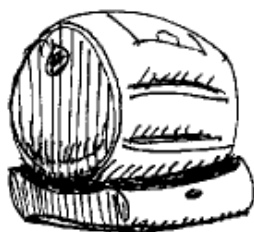

ALSO, THERE IS  
AN EXPANDING  
AWARENESS OF  
THE DELETERIOUS  
**HEALTH EFFECTS**  
OF PROCESSED  
FOOD, WHICH IS  
DRIVING UP THE  
INTEREST TOWARDS  
ORGANIC!

NOW, AS  
MARKETERS,  
HOW CAN  
WE  
**START**  
**MONETIZING**  
ALL THIS  
?

## **TIP ONE:** PHYSICAL PRODUCTS

The most obvious and lucrative way is to promote products related to organic gardening as **Amazon affiliate**. Look for **compost bins** - there are dozens of them with over \$100 price tag and good reviews

COMPOST  
TUMBLER

## **TIP TWO:** DIGITAL PRODUCTS

Head over to **Clickbank** and investigate **Home & Garden : Gardening & Horticulture** section of the Marketplace. There are courses with decent gravity that are directly related to this niche.

## **TIP THREE:** CPA OFFERS

Go to **Offervault** and do a search for **"gardening"**. You'll find many garden clubs paying \$10-\$20 per lead.

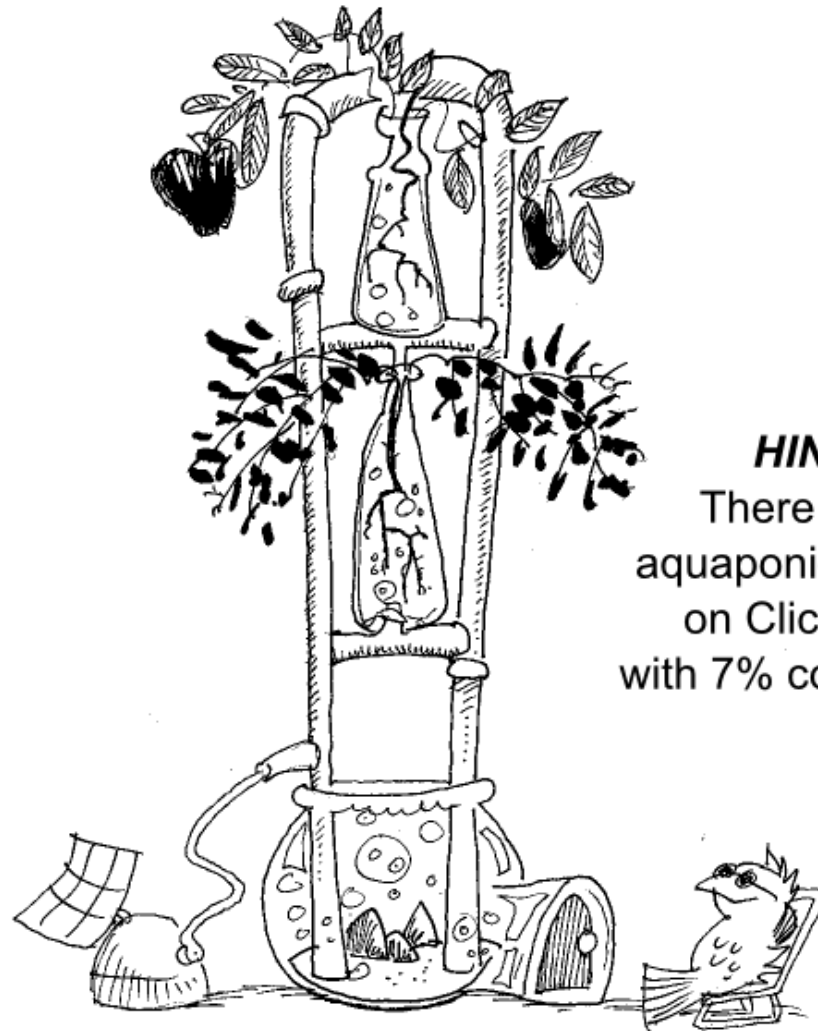

## HOT BONUS TIP #1

Check out  
**"urban farming"**  
at Google  
Insights, and see  
how it is trending  
up powerfully.

This implies that there is  
demand for information  
about how to grow edibles  
in limited spaces like city  
apartments.

One solution, that  
has surfaced lately  
is **"window farming"**  
based on **hydroponics**  
(cultivating  
plants in circulating  
water) or **aquaponics**  
(same as above, only  
water coming from  
aquarium with live fish)

**HINT:**  
There is an  
aquaponic course  
on Clickbank  
with 7% conversion

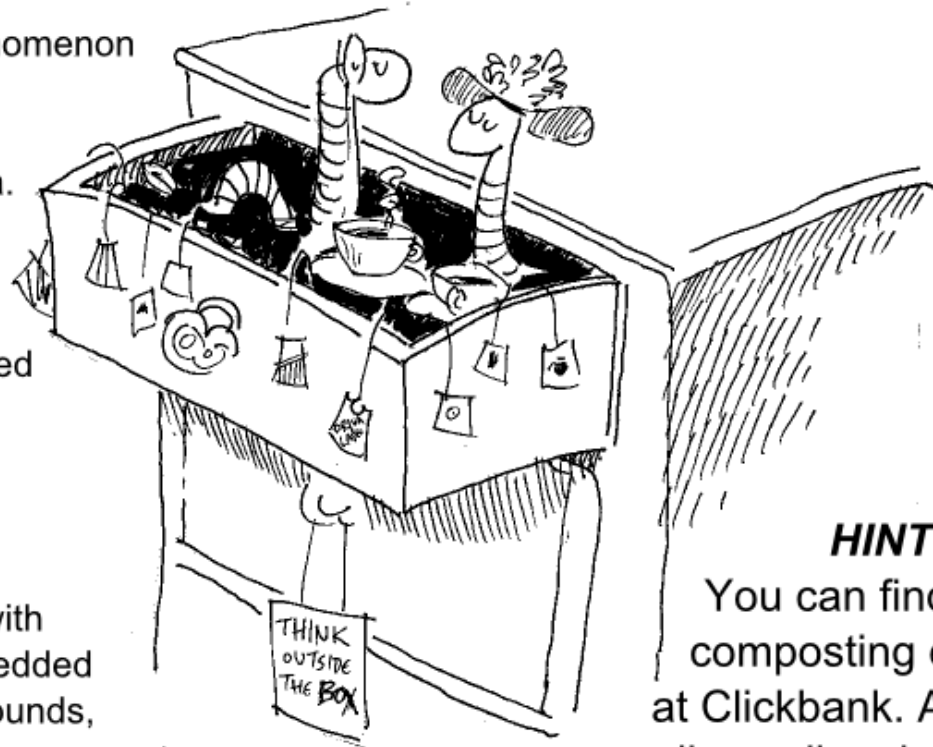

## HOT BONUS TIP #2

There's another interesting phenomenon connected with the urban farming sub-niche: indoor **worm composting** (a.k.a. **vermicomposting**.)

Basically you can make your own compost with a box filled with special bedding and special red worms (both can be purchased online)

You feed the worms with vegetable scraps, shredded newspaper, coffee grounds, tea bags etc.

(Oh and there's no odor.  
in case you were wondering)

### **HINT:**

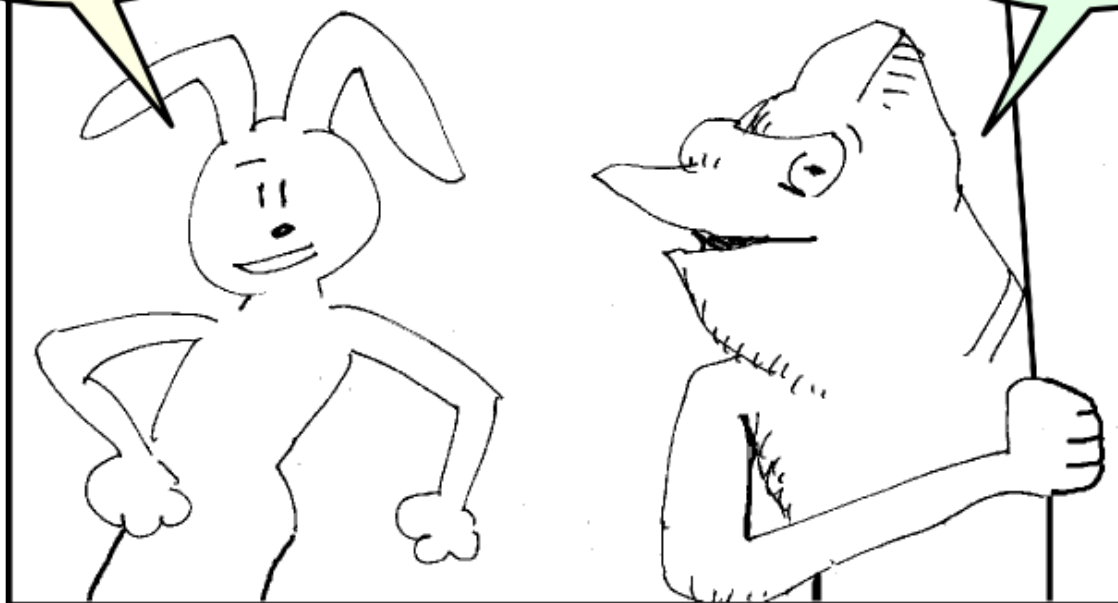

You can find worm composting e-books at Clickbank. Also some online sellers have affiliate programs: check out [organicwormfarm.com](http://organicwormfarm.com) and [compostmania.com](http://compostmania.com)
